## Alternatives to pirate bay 2019

Protect your privacy while torrenting! There are a few things that happen when a torrent site gets too big. Lawsuits are starting to flood in, the site is starting to get clogged, and - at least in the case of The Pirate Bay - the owners are being sent to jail. The Pirate Bay, king of Torrent sites, may not be quite dead yet. But as more ISPs around the world block the site, people are looking for alternatives to The Pirate Bay. We've put together a list of the top 8 Pirate Bay options. These sites are safe, free and are available in a wide range of torrents. What is The Pirate Bay? Pirate Bay (sometimes called TPB) is a torrent site founded in Sweden in 2003. The site has been highly controversial because of its connection to copyright infringement. The founders of Pirate Bay, members of a Swedish anti-copyright lobby group, made no secret of their intentions to help distribute pirated material. Note: Not all material made available through torrents is copyrighted. We will not tolerate any illegal activity. What made the Pirate Bay so good? Pirate Bay began hosting on four Linux servers and was funded by donations. It quickly grew to the most visited torrent site on the web. Pirate Bay was the first site to offer a safe, user-friendly way to find torrents. A lot of people started using it. This meant that the site soon became a host for a wide variety of torrents. While many people love The Pirate Bay and its huge impact on the internet - there are plenty of other torrent sites these days that are just as good, if not better. What happened to the Pirate Bay? Pirate Bay has been beleaded by legal issues since 2007. Its founders have been fined, sent to prison and threatened with cyber attacks on parts of the media industry. As a result, The Pirate Bay has experienced a lot of downtime. Authorities have blocked the site in many parts of the world. And the domain has moved - from Greenland to Peru to Guyana. All-in-all, while the Pirate Bay is still possible, torrent sources are more reliable. The best Pirate Bay alternatives We have done our research on these sites. We're sure they're the best options for The Pirate Bay. But there are a few things to remember: Some torrent sites may be blocked in your country or blocked by your Internet service provider (ISP). Like any online content, it can't 100% guarantee that all torrents that these sites make available are free of malware. We are not in favour of downloading illegal content that may be available on these sites. You can make things easier, safer, and more anonymous with torrenting or sharing. First of all, you can use a virtual private network (VPN). Using a VPN service is essential for torrenting for three reasons: It helps you to use blocked in your area, or your ISP. It prevents your ISP and local authorities from knowing which websites you are visiting. That's it, that's your online identity anonymously from torrent site owners. Also install antivirus software on your device to avoid viruses, spyware, Trojans, and other malware. Finally, we recommend blocking ads or installing a privacy-focused browser like Firefox to avoid intrusive ads. Here is a list of the best alternatives to The Pirate Bay. 1337x.to is a very popular torrent site. Its impressive Alexa ranking is 333 (as of December 2019), which means it's the 333rd in the network. A number of factors 1337x.to. It has a great interface - it is one of the most user-friendly torrent sites. It provides links to a wide range of content. It also has a very active community. This last point is important - 1337x.to often leave comments on torrent links and offer their opinions on the quality or security of the content. It is reassuring to read such a conversation among site users before downloading the torrent. KickassTorrents was once a giant of the torrent world. But in July 2016, US authorities seized the KickassTorrents domain name over copyright infringement allegations. The owner of the site is currently in prison in Poland fighting extradition to the United States. Although the original KickassTorrents site is no longer running, the staff behind the original site have set up a new website. It also has the same name and appearance as the original KickassTorrents. Torrents site kator.co is a new site - not a proxy for the old one - and some users report that it is not quite up to the original standards. However, the new KickassTorrents gets many of the same things right as the old KickassTorrents - a great interface, a wide range of content and a reliable team of staff dedicated to a good user experience. EZTV is a torrent site dedicated to TV tabs. EZTV is great for basics - it has a user-friendly interface and offers secure content. And it also comes with a few additional features that make this torrent site special. For example, EZRV provides a built-in anonymity check that ensures that your IP address doesn't indicate your location or identity. It also has a calendar of upcoming episode release dates, so you don't have to look for TV episodes that haven't been broadcast yet. If you are looking for TV shows, EZTV should be the first place you check out. Go to EZTV. YTS has a long and complex history that begins with life as a YIFY website specially created to share high-quality video files compressed through an x264 video codec (created by the site founder). This legacy means that YTS continues to focus on indexing torrents of HD movies with small file sizes. This makes it a great option for people with slow or small hard drives. YTS is one of the most visited torrent sites in the world. In fact, it's one of the most visited websites in the world - the impressive Alexa ranking is 258 (from from 2019). However, the popularity of the site has passed its peak - it has been banned in many countries over the years and has transferred domains many times. Previously yts.am, the YTS now lives in Lithuanian territory - yts.lt - but may have to move again soon. Go to YTS. Zooqle has a rare thing among torrent sites - the .com domain. This reflects the fact that the site is relatively new and hasn't been chased from domain to domain - yet. Although Zooqle is new, it is already quite well established. Zooqle shows links to millions of verified torrent guys, and thousands more are added every day. And if you're looking for something that's not listed on the site yet, you can set an alert to notify you when it becomes available. There are a couple of drawbacks to using Zooqle. The unique interface of the site divides opinion. And while no public torrent site is completely ad-free, Zooqle seems to be particularly heavy on ads. Visit Zooqle. ExtraTorrent was once one of the most popular torrent sites online until it closed voluntarily in 2017. The site owners left a message warning users not to trust copying sites that would take the place of the extratorrent. However, several copy sites appeared - and one of them turned out to be pretty good. The site currently on the domain extratorrent.ag itself as a successor and replacement for ExtraTorrent. It offers a familiar user-friendly interface from ExtraTorrent - and a wide range of torrents organized into categories including movies, anime, games and software. ExtraTorrent purists may not approve of this copy site (which is said to be connected to EZTV) - but it's worth checking out if you want to try one of the biggest torrent sites of all time. Visit ExtraTorrent. Torrentz2 is a meta-search engine - a tool for searching multiple torrent sites at once. Think of Torrentz2 as a search engine that excludes all websites except torrent sites. It crawls a huge number of torrents - over 60 million - making it a great option to find obscure content. Torrentz2 has a very simple design and displays very few ads. There is a feature called myTorrentz that displays recently added content on various torrent sites. Be careful with Torrentz2 - its search results show torrents from many different websites, and there is no guarantee that they will all be safe. Torrentz2 displays the source of its search results, so avoid downloading torrents from any sites that aren't on our list. Visit Torrentz2. RARBG is a beloved torrent site founded in 2008. RARBG offers all kinds of content, but its specialty is HD video. RARBG makes our list mainly because it indexes so many torrents. For many people, RARBG is the first place to look for movies and TV shows. Site However, a couple of problems. First of all, the ads are quite intrusive. Some users complain that this makes it difficult to navigate and use the site. Secondly, RARBG is banned in many countries, including the United Kingdom, India and Ireland. However, it is possible to use a VPN to bypass such bans. Visit RARBG. There were a few popular torrent sites that didn't do it to the list of the best Pirate Bay options. RUTracker - A very popular Russian torrent site that is, well... Russian! You can use Google Translate to navigate it - or you can just use another site. iDope - At the time of writing, we couldn't find a reliable way to access the popular torrent site iDope. This could change in the future. Limetorrents - Usually ranks as the fourth most popular torrent site online. However, we have found Limetorrents unreliable and its main page is currently redirecting to a mirror site. Working Pirate Bay mirror sites We have provided the links above as safe and reliable alternatives to The Pirate Bay. But there is another way to get to The Pirate Bay - through a mirror site (sometimes called a proxy site). The mirror site is basically a copy of the website. Anyone can assign a mirror site to their own domain. There is usually a delay between updating the content on the parent site and the mirror site, but this can only take a few hours. Here are some of the best mirror/proxy sites in The Pirate Bay. Use the nearest Pirate Bay proxy to access the fastest download speeds: Torrents - FAQSin which is a torrent? Torrent is a kind of file that allows you to download content like videos, music or software. The torrent file itself does not contain this content - it only tells your device where to find it (among other things). Torrents download small files from multiple locations. After you download part of the file, it will also be made available to other bittorrent network peers (users). A BitTorrent client is required to access the torrent file. This reads the torrent file and allows you to communicate with your peers to facilitate the download process. Torrents are a popular way to share files over a peer-to-peer network mainly because they allow you to download large files quickly and efficiently. Are torrents safe? Torrenting is not inherently dangerous. Downloading torrents is simply a way to download a file - the file can be completely safe. There are certain risks associated with downloading any file. Since torrent sites operate largely underground, it is possible that the file they make available will be infected with malware such as spyware, viruses, or ransomware. Download torrents only from trusted sites and make sure you have antivirus software installed on your device. Are torrents legal? There is nothing illegal about downloading a torrent. BitTorrent (the communication protocol used to share torrents) is not illegal. However, torrents have often been used illegally with copyright content sharing. Therefore, torrents are associated with illegal activity. Torrent sites have been a common target of lawsuits, mostly from the entertainment and pornography industries. I saw The. The, it's me. The bay was blocked in many countries. Ordinary people who use torrents are also the subject of thousands of lawsuits every year. While we're not in favour of downloading copyrighted material - it's possible to do it accidentally on many torrent websites. Many torrent users are also shocked to receive threatening emails from their users warning them not to download copyrighted material. That's why we recommend using a VPN when downloading, sharing, or searching for torrents. The best VPNs mask your IP address, hide your location and identity, and prevent you and the authorities from spying on your activities. Activity.
